

Confirmed or Suspected Cases at the School

FERPA and state law related to privacy of educational records. Additional guidance can be found [here](#).

- Consult with [CDPH K-12 School Testing Guidance](#) if routine testing is being considered by a LEA.
- Support students who are at higher risk for severe illness or who cannot safely distance from household contacts at higher risk, by providing options such as distance learning.

What to do if there is a Confirmed or Suspected Case of COVID-19 in a School

What measures should be taken when a student, teacher or staff member has symptoms, is a contact of someone infected, or is diagnosed with COVID-19?

Table 2. Actions to take if there is a confirmed or suspected case of COVID-19 in a school

	Student or Staff with:	Action	Communication with school community
1.	COVID-19 symptoms (e.g., fever, cough, loss of taste or smell, difficulty breathing) Symptom screening: per CDC Symptom of COVID-19 .	<ul style="list-style-type: none"> • Send home if at school. • Recommend testing (If positive, see #3, if negative, see #4). • School/classroom remain open. 	<ul style="list-style-type: none"> • No action needed.
2.	Close contact (†) with a confirmed COVID-19 case.	<ul style="list-style-type: none"> • Send home if at school. • Exclude from school for 10 days from last exposure, per CDPH quarantine recommendations. • Recommend testing 5-7 days from last exposure (but will not shorten 10-day exclusion if negative). • School/classroom remain open. 	<ul style="list-style-type: none"> • Consider school community notification of a known exposure. No action needed if exposure did not happen in school setting.
3.	Confirmed COVID-19 case infection.	<ul style="list-style-type: none"> • Notify the LHD. • Exclude from school for 10 days from symptom onset date or, if asymptomatic, for 10 days from specimen collection date. • Identify school contacts (†), inform the LHD of identified contacts, and exclude 	<ul style="list-style-type: none"> • School community notification of a known case. • Notification of persons with

		<p>contacts (possibly the entire stable group (††)) from school for 10 days after the last date the case was present at school while infectious.</p> <ul style="list-style-type: none"> • Recommend testing asymptomatic contacts 5-7 days from last exposure and immediate testing of symptomatic contacts (negative test results will not shorten 10-day exclusion). • Disinfection and cleaning of classroom and primary spaces where case spent significant time. • School remains open. 	<p>potential exposure if case was present in school while infectious</p>
4.	<p>Symptomatic person tests negative or a healthcare provider has provided documentation that the symptoms are typical of their underlying chronic condition.</p>	<ul style="list-style-type: none"> • May return to school after 24 hours have passed without fever and symptoms have started improving. • School/classroom remain open. 	<ul style="list-style-type: none"> • Consider school community notification if prior awareness of testing.

(†) A contact is defined as a person who is within 6 feet from a case for more than 15 minutes cumulative within a 24-hour period, regardless of face coverings. In some school situations, it may be difficult to determine whether individuals have met this criterion and an entire stable group, classroom, or other group may need to be considered exposed, particularly if people have spent time together indoors.

(††) See Stable Group Guidance for definition of a stable group. In some situations, (e.g., when seating charts are used, face covering is well adhered to, and teachers or staff have observed students adequately throughout the day), contact tracing and investigation may be able to determine more precisely whether each stable group member has been exposed. In this situation, those who were not close contacts could continue with in-person instruction.

CONFIRMED COVID-19 CASE

Although the LHD may know of a confirmed or probable case of COVID-19 in a student or staff member before the school does, it is possible that the school may be made aware of a case before the LHD via a parent or staff member report.

The following are the interim COVID-19 case definitions from the Council of State and Territorial Epidemiologists'.

Confirmed case: Meets confirmatory laboratory evidence (detection of SARS-CoV-2 RNA in a clinical or autopsy specimen using a molecular amplification test).

Probable case: Meets clinical criteria AND epidemiologic linkage(‡) with no confirmatory lab testing performed for SARS-CoV-2; OR meets presumptive laboratory evidence (detection of SARS-CoV-2 by antigen test in a respiratory specimen); OR meets vital records criteria with no confirmatory laboratory evidence for SARS-CoV-2.

(‡) Epidemiologically-linked cases include persons with close contact with a confirmed or probable case of COVID-19 disease; OR a member of a risk stable group as defined by public health authorities during an outbreak. This includes persons with identifiable connections to each other such as sharing a defined physical space e.g., in an office, facility section or gathering, indicating a higher likelihood of linked spread of disease than sporadic community incidence.

Local Health Department Actions

1. Interview the case to identify the infectious period and whether case was infections while at school; identify household and community close contacts, particularly any close contacts at school.
2. It may be necessary to consider the entire class or members of the case's stable group exposed, as it can be challenging to determine who may have had contact with the case within 6 feet for at least 15 cumulative minutes in a 24-hour period. In some situations, case investigations may be able to determine individual members of a stable group are close contacts, and allow those who are not identified as close contacts to continue in-person instruction.
3. Notify the school COVID-19 coordinator or point person at the school that a case of COVID-19 in a student or staff member has been reported and provide guidance to identify and generate a line list of close contacts at the school.
4. Notify all close contacts at the school and instruct them to follow CDPH COVID-19 Quarantine Guidance. (or follow LHO orders, if relevant and/or more stringent).
5. Recommend that all close contacts be tested; symptomatic contacts should be prioritized for immediate testing, and asymptomatic contacts should be recommended to be tested 5-7 days from last exposure.
6. Contacts who test negative must still complete the required quarantine as defined in the CDPH guidance.
7. Contacts who test positive are required to isolate until at least 10 days

have passed since symptom onset; and at least 24 hours have passed since resolution of fever without the use of fever-reducing medications; and other symptoms have improved. If asymptomatic, cases should be isolated for 10 days after the specimen collection date of their positive test.

8. Investigate COVID-19 cases in school students and staff to determine if in-school transmission likely occurred and whether any school-related factors could have contributed to risk of infection. Assist schools to update protocols as needed to prevent additional cases.

School Actions

1. Schools must adhere to required reporting requirements and notify, as indicated, the LHD of any newly reported case of COVID-19 in a student or staff member if the LHD has not yet contacted them about the case.
2. If the case is present at school at the time the school is notified, the case must go home and be excluded from school for at least 10 days from symptom onset date or, if asymptomatic, 10 days from the date the specimen was collected for the positive test.
3. Send a notice, developed in collaboration with the LHD, to parents and staff to inform them that a case of COVID-19 in a student or staff member has been reported and that the school will work with the LHD to notify exposed people. (see sample notification #1 in Appendix 2).
4. Arrange for cleaning and disinfection of the classroom and primary spaces where case spent significant time (see Cleaning and Disinfection above for recommendations). This does not need to be done until students and staff in the area have left for the day.
5. Implement online/distance learning for student cases if they are well enough to participate.

School closure determinations should be made in consultation with the LHO according to the section "School Closure Determinations." A school with confirmed cases and even a small cluster of COVID-19 cases can remain open for in-person education as long as contact tracing identifies all school contacts for exclusion and testing in a timely manner, any small cluster is investigated and controlled rapidly, and the LHO agrees that the school can remain open.

MEASURES FOR WHEN A CLUSTER OR OUTBREAK IS BEING INVESTIGATED AT A SCHOOL

When either a school or LHD is aware that an outbreak may be underway, the LHD should investigate, in collaboration with the school, to determine whether
